SALEM HIGH SCHOOL
Arkansas Comprehensive School Improvement Plan
2008-2009

Approved:

## Salem High School

Arkansas Consolidated School Improvement Plan
It is the mission of the Salem High School to educate students in a safe environment. Our school will provide a challenging curriculum promoting higher-order thinking skills, technology skills, and problemsolving abilities through relevant and engaging activities. We will, in cooperation with the community, provide the experiences necessary for students to become responsible citizens

Grade Span: 7-12
Title I: Title I Schoolwide
School Improvement:

## Table of Contents

Priority 1: Literacy
Goal: To improve reading comprehension and writing skills across the curriculum. Focus areas will be open response, writing content and style, and reading comprehension and vocabulary.
Priority 2: Math
Goal: To improve students' mathematics problem-solving skills and ability to respond to open-response items. Focus areas will be measurement, number sense/operations, and open response questions.
Priority 3: Wellness
Goal: The district will provide educational opportunities for students in making healthy lifestyle choices by implementing activities to aid in decreasing the average BMI on the annual student screening.

Priority 1: To improve the literacy skills of all Salem High students.

1. In 2006, $58 \%$ of combined students scored proficient or advanced on the Literacy (Grade 11) exam, $50 \%$ of socio economic deprived students scored proficient or advanced on the Literacy (Grade 11) exam, 0\% of students with disabilities scored proficient or advanced on the Literacy (Grade 11) exam. The lowest identified areas for the combined students were: OR; Literary $56 \%$, Content 50\%, and Practical 69\%, MC; Literacy 69\%, Content 69\%. The lowest identified areas for the socio economic deprived students were: OR; Literary 63\%, Content 63\%, and Practical 63\%, MC; Content $69 \%$. The lowest identified areas for the students with disabilities were: OR; Literary 44\%, Content 44\%, and Practical 50\%, MC; Literary 31\%, Content 44\%, Practical 63\%, Writing;

Supporting Data: Content 63\%, Style 63\%. In 2006 80\% of the combined students scored proficient or advanced on the literacy portion of the 7 th grade Benchmark, $73 \%$ of the socio ecomonic deprived students scored proficient or advanced on the literacy portion of the 7th grade Benchmark, 0\% of the students with disabilities scored proficient or advanced on the literacy portion of the 7th grade Benchmark. The lowest identified areas for the combined students were: OR; Literary 63\%, Content 50\%, Practical 50\%, Multiple Choice Writing 38\%. The lowest identified areas for the students with disabilities were: OR; Literary 38\%, Content 50\%, Practical 50\%, MC; Literary 38\%, Content 50\%, Practical 50\%, Writing Multiple Choice 38\%, Writing; content 64\%, Style 64\%. In 2006 67\% of the combined students scored proficient or advanced on the literacy portion of the 8th grade Benchmark, $61 \%$ of the socio ecomonic deprived students scored proficient or advanced on the literacy portion of the 8th grade Benchmark, $0 \%$ of the students with disabilities scored
proficient or advanced on the literacy portion of the 8th grade Benchmark. The lowest identified areas for the combined students were: OR; Content $63 \%$, MC; Content $63 \%$, Writing Multiple Choice $38 \%$. The lowest identified areas for the students with disabilities were: OR; Literary 38\%, Content 50\%, Practical 50\%, MC; Literary 38\%, Content 50\%, Practical 50\%, Writing Multiple Choice $38 \%$, Writing; content $64 \%$, Style $64 \%$. In 2006, the combined population of seventh grade students scored in the 71 percentile in Reading on the Iowa Test of Basic Skills, students with disabilities scored in the 45 percentile in Reading on the Iowa Test of Basic Skills, socio economic deprived students scored in the 66 percentile in Reading on the Iowa Test of Basic Skills. The lowest identified areas for the combined population were: Factual Understanding 73 percentile, Inferece and Interpretation 75 percentile, and Analysis and Generalization 76 percentile. The seventh grade combined population scored in the 57 percentile in total language on the Iowa Test, students with disabilities scored in the 45 percentile in total language, and socio economic deprived students scored in the 44 percentile in total language. The lowest identified areas for the combined population were capitalization 49 percentile and Punctuation 53 percnetile. In 2006, the eighth grade combined population scored in the 58 percentile in Reading on the Iowa Test of Basic Skills test, students with disabilities scored in the 38 percentile in Reading on the Iowa Test of Basic Skills test, socio economic deprived students scored in the 43 percentile in Reading on the Iowa Test of Basic Skills test. The lowest identified areas for the combined population were: Factual Understanding 65 percentile, Inference and Interpretation 69 percentile, and Analysis and Generalization 62 percentile. The eighth grade combined population scored in the 47 percentile in total language on the Iowa Test, students with disabilities scored in the 20 percentile in total language, and socio economic deprived students scored in the 54 percentile in total language. The lowest identified areas for the combined population were capitalization 46 percentile and Punctuation 43 percnetile. In 2006, the ninth grade combined population scored in the 56 percentile in Reading Comprehension on the Iowa Test of Educational Development test, students with disabilities scored in the 30 percentile in Reading Comprehension on the Iowa Test of Education Development test, and socio economic deprived students scored in the 43 percentile in Reading on the Iowa test of Educational Development. The lowest identified areas for the combined population were: Vocabulary 51 and Comprehension 53 perentile. The ninth grade combined population scored in the 52 percentile in language on the Iowa Test, students with disabilities scored in the 36 percentile in language, and socio economic deprived students scored in the 40 percentile in language. The lowest identified areas for the combined population were Spelling 50 and Revising Writing 51.
2. In $2007,57 \%$ of combined students scored proficient or advanced on the Literacy (Grade 11) exam, $60 \%$ of socio economic deprived students scored proficient or advanced on the Literacy (Grade 11) exam, $0 \%$ of students with disabilities scored proficient or advanced on the Literacy (Grade 11) exam. The lowest identified areas for the combined students were: OR; Practical 56\%, MC; Writing 75\%. The lowest identified areas for the socio economic deprived students were: OR; Practical $69 \%$, The lowest identified areas for the students with disabilities were: OR; Literary $63 \%$, Content $25 \%$, and Practical $25 \%$, MC; Content $13 \%$, Practical $25 \%$, Writing; Content $69 \%$, Style 69\%. In 2007 64\% of the combined students scored proficient or advanced on the literacy portion of the 7th grade Benchmark, $59 \%$ of the socio ecomonic deprived students scored proficient or advanced on the literacy portion of the 7th grade Benchmark, 0\% of the students with disabilities scored proficient or advanced on the literacy portion of the 7th grade Benchmark. The lowest identified areas for the combined students were: OR; Literary 50\%, Content 50\%, Practical 63\%, Multiple Choice Writing 50\%. The lowest identified areas for the students with disabilities were: OR; Literary 50\%, Content 50\%, Practical 63\%, MC; Literary 38\%, Content $50 \%$, Practical 50\%, Writing Multiple Choice 38\%, Writing; content 64\%, Style 64\%. In 2007 $76 \%$ of the combined students scored proficient or advanced on the literacy portion of the 8th grade Benchmark, $61 \%$ of the socio ecomonic deprived students scored proficient or advanced on the literacy portion of the 8th grade Benchmark, $0 \%$ of the students with disabilities scored proficient or advanced on the literacy portion of the 8th grade Benchmark. The lowest identified areas for the combined students were: OR; Content 38\%, Writing Multiple Choice 50\%. The lowest identified areas for the students with disabilities were: OR; Literary 63\%, Content 25\%, Practical 38\%, MC; Literary 38\%, Content 63\%, Practical 38\%, Writing Multiple Choice 38\%, Writing; content $63 \%$, Style $63 \%$. In 2007, the combined population of seventh grade students scored in the 63 percentile in Reading on the Iowa Test of Basic Skills, students with disabilities scored in the 30 percentile in Reading on the Iowa Test of Basic Skills, socio economic deprived students scored in the 56 percentile in Reading on the Iowa Test of Basic Skills. The lowest identified areas for the combined population were: Factual Understanding 63 percentile, Inferece and Interpretation 69 percentile, and Analysis and Generalization 67 percentile. The seventh grade combined population scored in the 47 percentile in total language on the Iowa Test, students with disabilities scored in the 15 percentile in total language, and socio economic deprived students scored in the 44 percentile in total language. The lowest identified areas for the combined population were vocabulary 42 percentile and over capitization 51 percnetile. In 2007, the eighth grade combined population scored in the 63 percentile in Reading on the Iowa Test of Basic Skills test, students with disabilities scored in the 21 percentile in Reading on the Iowa Test of Basic Skills test, socio economic deprived students scored in the 58 percentile in Reading on the Iowa Test of Basic Skills test. The lowest identified areas for the combined population were: Vocabulary 42 percentile, Spelling 29 percentile. The eighth grade combined population scored in
the 48 percentile in total language on the Iowa Test, students with disabilities scored in the 15 percentile in total language, and socio economic deprived students scored in the 42 percentile in total language. The lowest identified areas for the combined population were Nouns, Pronouns 56 percentile and Apostrophe 40 percnetile. In 2007, the ninth grade combined population scored in the 55 percentile in Reading Comprehension on the Iowa Test of Educational Development test, students with disabilities scored in the 25 percentile in Reading Comprehension on the Iowa Test of Education Development test, and socio economic deprived students scored in the 42 percentile in Reading on the Iowa test of Educational Development. The lowest identified areas for the combined population were: Vocabulary 60 and Words with AFF. 59 perentile. The ninth grade combined population scored in the 53 percentile in language on the Iowa Test, students with disabilities scored in the 19 percentile in language, and socio economic deprived students scored in the 45 percentile in language. The lowest identified areas for the combined population were Spelling 42 and Organization of Materials 51.
3. In 2008, $77 \%$ of combined students scored proficient or advanced on the Literacy (Grade 11) exam, $71 \%$ of socio economic deprived students scored proficient or advanced on the Literacy (Grade 11) exam, $25 \%$ of students with disabilities scored proficient or advanced on the Literacy (Grade 11) exam. The lowest identified areas for the combined students were: OR; Literary 75\%, MC; Literary $75 \%$, Content $75 \%$. The lowest identified areas for the socio economic deprived students were: OR; Literary 75\% Content 69\%, MC; Literary 75\%, Content 75\% .The lowest identified areas for the students with disabilities were: OR; Literary $56 \%$, Content $50 \%, \mathrm{MC}$; Content 50\%, Practical 63\%, Writing; Multiple Choice 63\%. In 2008 79\% of the combined students scored proficient or advanced on the literacy portion of the 7th grade Benchmark, 65\% of the socio ecomonic deprived students scored proficient or advanced on the literacy portion of the 7th grade Benchmark, 0\% of the students with disabilities scored proficient or advanced on the literacy portion of the 7th grade Benchmark. The lowest identified areas for the combined students were: OR; Literary 69\%, Content 63\%, Practical 63\%, Multiple Choice Writing 50\%; MC; Practical $57 \%$. The lowest identified areas for the students with disabilities were: OR; Literary 69\%, Content 63\%, Practical 63\%, MC; Practical 57\%, Writing Multiple Choice 38\%, Writing; content 64\%, Style 64\%. In 2008 74\% of the combined students scored proficient or advanced on the literacy portion of the 8 th grade Benchmark, $78 \%$ of the socio ecomonic deprived students scored proficient or advanced on the literacy portion of the 8th grade Benchmark, 10\% of the students with disabilities scored proficient or advanced on the literacy portion of the 8 th grade Benchmark. The lowest identified areas for the combined students were: OR; Practical $71 \%$, Writing Multiple Choice $71 \%$. The lowest identified areas for the students with disabilities were: OR; Practical $71 \%$,Writing Multiple Choice $71 \%$, In 2008, the combined population of seventh grade students scored in the 60 percentile in Reading and 50 percentile in Comprehensive Language on the Stanford 10, students with disabilities scored in the 21 percentile in Reading and 15 percentile in Comprehensive Language on the Stanford 10. In 2008, the eighth grade combined population scored in the 59 percentile in Reading and 41 percentile in Comprehensive Language on the Stanford 10 test, students with disabilities scored in the 27 percentile in Reading and 13 percentile in Comprehensive Language on the Stanford 10 test. In 2008, the ninth grade combined population scored in the 76 percentile in Reading Comprehension and 66 percentile in Language on the Stanford 10, students with disabilities scored in the 33 percentile in Reading Comprehension and 0 percentile in Language on the Stanford 10, and socio economic deprived students scored in the 70 percentile in Reading and 63 percentile on the Stanford 10.
4. Students have scored an average of 21.6 on the ACT exam in English and a 22.0 in reading during the 2006, 2007, and 2008 school years.
5. The 2008 Arkansas Adequate Yearly Progress Report list the Salem High School graduation rate as meeting the state standard.
6.

Goal
To improve reading comprehension and writing skills across the curriculum. Focus areas will be open response, writing content and style, and reading comprehension and vocabulary.
Benchmark To meet the state Adequate Yearly Progress (AYP) requirement anually

Priority 2: To improve the math skills of all Salem High students.

1. In 2006, $74 \%$ of combined students scored proficient or advanced on the Math portion of the 7th grade Benchmark Exam, 48\% of socio economic deprived students scored proficient or advanced on the Math portion of the 7th grade Benchmark Exam, $40 \%$ of students with disabilities scored proficient or advanced on the Math portion of the 7th grade Benchmark Exam. The lowest identified areas for the combined population were: OR; Number Sense Properties and Operations 25\%, Algebra 38\%, Geometry 25\%, Measurement 38\%, Data Analasis Probability 38\%, MC; Algebra 63 \%, Geometry 63\%, Measurement 67\%, Data Analysis Statists and Probability 56\%. The lowest identified areas for socio economic deprived students were: OR; . The lowest identified areas for students with disabilities were: OR; Number Sense Properties and Operations 25\%, Geometry and Spatial Sense 13\%, Measurement 50\%, Data Analysis Statistics and Probability

Supporting
Data: $63 \%$, Patterns Algebra and Functions 25\%, MC; Number Sense Properties and Operations 25\%, Geometry and Spatial Sense 38\%, Measurement 50\%, Data Analysis Statistics and Probability $38 \%$, Patterns Algebra and Functions 50\%. In 2006, 50\% of combined students scored proficient or advanced on the Math portion of the 8th grade Benchmark Exam, 27\% of socio economic deprived students scored proficient or advanced on the Math portion of the 8th grade Benchmark Exam, $0 \%$ of students with disabilities scored proficient or advanced on the Math portion of the 8th grade Benchmark Exam. The lowest identified areas for the combined population were: OR; Algebra 38\%, Geometry 25\%, Measurement 50\%, Data Analasis and Probability 44\%, MC; Algebra 50\%, Geometry 50\%, Measurement 57\%, Data Analysis Statists and Probability 44\%. The lowest identified areas for socio economic deprived students were: OR; . The lowest identified areas for students with disabilities were: OR; Number Sense Properties and Operations 25\%, Geometry and Spatial Sense 13\%, Measurement 50\%, Data Analysis Statistics and Probability 63\%, Patterns Algebra and Functions 25\%, MC; Number Sense Properties and Operations 25\%,

Geometry and Spatial Sense 38\%, Measurement 50\%, Data Analysis Statistics and Probability $38 \%$, Patterns Algebra and Functions 50\%. In 2006, $90 \%$ of combined students scored proficient or advanced on the Algebra End of Course Exam, 37\% of socio economic deprived students scored proficient or advanced on the Algebra End of Course Exam, 100\% of students with disabilities scored proficient or advanced on the Algebra End of Course Exam. The lowest identified areas for the combined population were: OR; Language of Algebra $56 \%$, Solve Equations and Inequalities $54 \%$, MC; Non-Linear Functions $57 \%$. The lowest identified areas for socio economic deprived students were: OR; . The lowest identified areas for students with disabilities were: OR; Language of Algebra 0\%, Solve Equations and Inequalities 0\%, Graphs and Tables 13\%, Functions Relations and Patterns 0\%, Polynomial Operations 38\%, MC; Language of Algebra 33\%, Solve Equations and Inequalities 42\%, Graphs and Tables 58\%, Functions Relations and Patterns 25\%, Polynomial Operations $58 \%$. In 2006, $71 \%$ of combined students scored proficient or advanced on the Geometry End of Course Exam, 75\% of socio economic deprived students scored proficient or advanced on the Geometry End of Course Exam, 0\% of students with disabilities scored proficient or advanced on the Geometry End of Course Exam. The lowest identified areas for the combined population were: OR; Language of Geometry 63\%, Triangles 50\%, Measurement 38\%, MC; Trianges 67\%, Relationships Between Two and Three Dimensions 64\%. In 2006, the combined seventh grade population scored in the 71 percentile in total math, students with disabilities scored in the 28 percentile, and socio economically deprived students scored in the 68 percentile. The lowest identified areas for the combined population were: Problem solving and data interpretation 68 percentile and Computation 66 percentile. In 2006, the combined eighth grade population scored in the 58 percentile in total math, students with disabilities scored in the 28 percentile, and socio economically deprived students scored in the 52 percentile. The lowest identified areas for the combined population were: Problem solving and data interpretation 55 percentile and Computation 53 percentile. In 2006, the combined ninth grade population scored in the 59 percentile in total math, students with disabilities scored in the 44 percentile, and socio economically deprived students scored in the 58 percentile. The lowest identified areas for the combined population were: Problem solving and data interpretation 67 percentile and Computation 57 percentile.
2. In $2007,71 \%$ of combined students scored proficient or advanced on the Math portion of the 7th grade Benchmark Exam, 65\% of socio economic deprived students scored proficient or advanced on the Math portion of the 7th grade Benchmark Exam, $22 \%$ of students with disabilities scored proficient or advanced on the Math portion of the 7th grade Benchmark Exam. The lowest identified areas for the combined population were: OR; Algebra 13\%, Geometry 50\%, Data Analasis Probability 25\%, MC; Data Analysis Statists and Probability 50\%. The lowest identified areas for socio economic deprived students were: OR; . The lowest identified areas for students with disabilities were: OR; Number Sense Properties and Operations 25\%, Geometry and Spatial Sense 13\%, Measurement 50\%, Data Analysis Statistics and Probability 63\%, Patterns Algebra and Functions 25\%, MC; Number Sense Properties and Operations 25\%, Geometry and Spatial Sense 38\%, Measurement 50\%, Data Analysis Statistics and Probability 38\%, Patterns Algebra and Functions $50 \%$. In 2007, $62 \%$ of combined students scored proficient or advanced on the Math portion of the 8 th grade Benchmark Exam, $50 \%$ of socio economic deprived students scored proficient or advanced on the Math portion of the 8th grade Benchmark Exam, 20\% of students with disabilities scored proficient or advanced on the Math portion of the 8th grade Benchmark Exam. The lowest identified areas for the combined population were: OR; Number and Operations $38 \%$, Algebra 50\%, Measurement 25\%, Data Analasis and Probability 50\%, MC; Number and Operations 50\%, Algebra 50\%, Geometry 50\%. The lowest identified areas for socio economic deprived students were: OR; . The lowest identified areas for students with disabilities were: OR; Number Sense Properties and Operations 25\%, Geometry and Spatial Sense 13\%, Measurement $50 \%$, Data Analysis Statistics and Probability 63\%, Patterns Algebra and Functions 25\%, MC; Number Sense Properties and Operations 25\%, Geometry and Spatial Sense 38\%, Measurement 50\%, Data Analysis Statistics and Probability 38\%, Patterns Algebra and Functions 50\%. In 2007, $78 \%$ of combined students scored proficient or advanced on the Algebra End of Course Exam, $78 \%$ of socio economic deprived students scored proficient or advanced on the Algebra End of Course Exam, $17 \%$ of students with disabilities scored proficient or advanced on the Algebra End of Course Exam. The lowest identified areas for the combined population were: OR; Language of Algebra 38\%, Solve Equations and Inequalities 50\%, MC; Non-Linear Functions 50\%. MC: Non-Linear Functions 67\%, Data Interpretation and Probability 73\%, Solve Equations and Inequalities $69 \%$. The lowest identified areas for socio economic deprived students were: OR; . The lowest identified areas for students with disabilities were: OR; Language of Algebra 0\%, Solve Equations and Inequalities 0\%, Graphs and Tables 13\%, Functions Relations and Patterns 0\%, Polynomial Operations 38\%, MC; Language of Algebra 33\%, Solve Equations and Inequalities 42\%, Graphs and Tables 58\%, Functions Relations and Patterns 25\%, Polynomial Operations $58 \%$. In 2007, $81 \%$ of combined students scored proficient or advanced on the Geometry End of Course Exam, $77 \%$ of socio economic deprived students scored proficient or advanced on the Geometry End of Course Exam, 33\% of students with disabilities scored proficient or advanced on the Geometry End of Course Exam. The lowest identified areas for the combined population were: OR; Language of Geometry 50\%, Triangles 38\%, Measurement 50\%, Relations between two and three dimensions 50\%, Coordinate Geometry and Transformations 63\%, MC; Trianges 67\%, Relationships Between Two and Three Dimensions 7\%. In 2007, the combined seventh grade
population scored in the 58 percentile in total math, students with disabilities scored in the 37 percentile, and socio economically deprived students scored in the 47 percentile. The lowest identified areas for the combined population were: Problem solving and data interpretation 60 percentile and Computation 44 percentile. In 2007, the combined eighth grade population scored in the 57 percentile in total math, students with disabilities scored in the 53 percentile, and socio economically deprived students scored in the 53 percentile. The lowest identified areas for the combined population were: Problem solving and data interpretation 53 percentile and Computation 61 percentile. In 2007, the combined ninth grade population scored in the 58 percentile in total math, students with disabilities scored in the 47 percentile, and socio economically deprived students scored in the 51 percentile. The lowest identified areas for the combined population were: Problem solving and data interpretation 67 percentile and Computation 58 percentile.
3. In 2008, $73 \%$ of combined students scored proficient or advanced on the Math portion of the 7 th grade Benchmark Exam, $61 \%$ of socio economic deprived students scored proficient or advanced on the Math portion of the 7th grade Benchmark Exam, $34 \%$ of students with disabilities scored proficient or advanced on the Math portion of the 7th grade Benchmark Exam. The lowest identified areas for the combined population were: OR; Numbers and Operations 15\%, Algebra $39 \%$, Geometry 49\%, Measurement 18\%, Data Analysis and Probability 35\% MC; Measurement $54 \%$. The lowest identified areas for socio economic deprived students were: OR; Numbers and Operations $15 \%$, Algebra $39 \%$, Geometry $49 \%$, Measurement 18\%, Data Analysis and Probability $35 \%$ MC; Measurement $54 \%$. The lowest identified areas for students with disabilities were: OR; Numbers and Operations 15\%, Algebra 39\%, Geometry 49\%, Measurement 18\%, Data Analysis and Probability $35 \%$ MC; Measurement $54 \%$. In 2008, $68 \%$ of combined students scored proficient or advanced on the Math portion of the 8th grade Benchmark Exam, $63 \%$ of socio economic deprived students scored proficient or advanced on the Math portion of the 8th grade Benchmark Exam, 10\% of students with disabilities scored proficient or advanced on the Math portion of the 8th grade Benchmark Exam. The lowest identified areas for the combined population were: OR; Number and Operations $38 \%$, Algebra $40 \%$, Geometry $34 \%$, Measurement $35 \%$, Data Analasis and Probability 31\%, MC; Number and Operations 54\%, Algebra 60\%, Geometry $56 \%$, Measurement $56 \%$. The lowest identified areas for socio economic deprived students were: OR; Number and Operations $38 \%$, Algebra $40 \%$, Geometry 34\%, Measurement $35 \%$, Data Analasis and Probability 31\%, MC; Number and Operations 54\%, Algebra 60\%, Geometry $56 \%$, Measurement $56 \%$. The lowest identified areas for students with disabilities were: OR; Number and Operations 38\%, Algebra 40\%, Geometry 34\%, Measurement 35\%, Data Analasis and Probability 31\%, MC; Number and Operations 54\%, Algebra 60\%, Geometry 56\%, Measurement $56 \%$. In 2008, $81 \%$ of combined students scored proficient or advanced on the Algebra End of Course Exam, 82\% of socio economic deprived students scored proficient or advanced on the Algebra End of Course Exam, $50 \%$ of students with disabilities scored proficient or advanced on the Algebra End of Course Exam. The lowest identified areas for the combined population were: OR; Language of Algebra $38 \%$, Solve Equations and Inequalities $25 \%$, Linear Functions 25\%, Non-Linear Functions 25\%, Data Interpretation and Probability 50\%, MC; Language of Algebra $66 \%$, Solving Equations and Inequalities $66 \%$, Linear Functions $66 \%$, Data Interpretation and Probability 66\%. The lowest identified areas for socio economic deprived students were: OR; Number and Operations 38\%, Algebra $40 \%$, Geometry 34\%, Measurement $35 \%$, Data Analasis and Probability 31\%, MC; Number and Operations 54\%, Algebra 60\%, Geometry $56 \%$, Measurement $56 \%$. The lowest identified areas for students with disabilities were: OR; Language of Algebra 25\%, Solve Equations and Inequalities $25 \%$, Linear Functions 0\%, Non Linear Functions 25, Data Interpretation and Probability 25\%, MC; Linear Functions 42\%, Non Linear Functions 50\%. In 2008, 69\% of combined students scored proficient or advanced on the Geometry End of Course Exam, 64\% of socio economic deprived students scored proficient or advanced on the Geometry End of Course Exam, 20\% of students with disabilities scored proficient or advanced on the Geometry End of Course Exam. The lowest identified areas for the combined population were: OR; Language of Geometry 50\%, Triangles $25 \%$, Measurement $50 \%$, Relationships between two and three Dimensions 63 \%. Coordinate Geometry and Transformations $25 \%$ MC; Language of Geometry $62 \%$, Triangles $62 \%$, Measurement $64 \%$, Relationships between two and three Dimensions 64\%, Coordinate Geometry and Transformations $67 \%$. The lowest identified areas for the socio economic deprived students are OR; Language of Geometry $50 \%$, Triangles $25 \%$, Measurement $50 \%$, Relationships between two and three Dimensions 63 \%. Coordinate Geometry and Transformations $25 \%$ MC; Language of Geometry $62 \%$, Triangles $62 \%$, Measurement $64 \%$, Relationships between two and three Dimensions $64 \%$, Coordinate Geometry and Transformations $67 \%$. The lowest areas for students with disabilites were: OR; Language of Geometry 38\%, Triangles 0\%, Measurement $50 \%$, Relationships between two and three Dimensions $25 \%$. Coordinate Geometry and Transformations $25 \%$ MC; Language of Geometry 54\%, Triangles 46\%, Measurement 31\%, Relationships between two and three Dimensions $46 \%$, Coordinate Geometry and Transformations $50 \%$. In 2008, the combined seventh grade population scored in the 67 percentile in total math, students with disabilities scored in the 27 percentile. In 2008, the combined eighth grade population scored in the 69 percentile in total math, students with disabilities scored in the 18 percentile. In 2008, the combined ninth grade population scored in the 80 percentile in total math, students with disabilities scored in the 0 percentile.
4. Students have scored an average of 20.3 in mathematics on the ACT exam during the 2006, 2007, and 2008 school years.
5. The 2008 Arkansas Adequate Yearly Progress Report lists the Salem High School graduation rate as meeting the state standard.

Goal
To improve students' mathematics problem-solving skills and ability to respond to open-response items. Focus areas will be measurement, number sense/operations, and open response questions.
Benchmark To meet the state Adequate Yearly Progress (AYP) requirement annually.

| Intervention: Align math curriculum to the Arkansas Frameworks. |  |  |  |  |  |  |  |  |

Priority 3: To improve the health and wellness of all Salem High Students.

1. 2006-2007 School Health Index High School: Module 1-93\% Module 2-97\% Module 3-87\% Module 4-92\% Module 8-55\% Free and Reduced Price Meal Eligibility SY 06-07: High School49\% paid, 12\% reduced, 39\% free. Migrant 06-07: 0 Homeless 06-07: 1 2006-2007 Youth Risk Behavior Survey: The average percentages of alcohol, cigarette, and chewing tobacco usage among Salem 8th, 10th, and 12th grade students meets or exceeds the state averages. In 2005-2006, 271 students had their BMI's assessed. Of the students assessed, the following represents the percent of students at risk of being overweight or overweight: High School: Males-53.3\% Females-47.7\%;
2. 2007-2008 School Health Index: High School: Module 1-92\% Module 2-96\% Module 3-87\% Module 4-92\% Module 8-55\% Free and Reduced Price Meal Eligibility SY 07-08: High School51\% paid, 9\% reduced, 40\% free. Migrant 07-08: 2 Homeless 07-08: 3 2007-2008 Youth Risk

Supporting Data:

Goal
The district will provide educational opportunities for students in making healthy lifestyle choices by implementing activities to aid in decreasing the average BMI on the annual student screening.
By the 2007-2008 school year, there will be a decrease of the average BMI for students in the Salem School District by $1 / 4 \%$ as evaluated by the 2006-2007 results of the annual BMI screening.
Benchmark
Intervention: Salem Schools will provide opportunities for students to practice healthy behaviors at school and encourage them to make healthy food choices and educate them concerning life-long physical activities which will result in higher academic achievement and a healthier life.
